

Parents,

We are so excited to share with you that students can access all the online education resources we have through a website or app called Clever. Clever is a page that allows students to login once and access our great educational websites without typing in their username and password. This also means the badges need to be kept safe and secure since the Clever badge should only be used by the student it belongs to. You will find your student's badge with this letter (it looks like a QR code or square barcode). Please keep it at home for your student to use. We have a copy at school as well.

How to use the Clever badge:

1. On a computer, tablet or other internet connected device that has a camera- Go to <https://clever.com/in/pwcs>

OR Download the Clever App from your app store (if

available).

Open App and go to Step 3.

2. Click on the blue and white icon that says **Clever Badge Login**. It will prompt your device's camera to come up.
3. You or your student can hold their Clever badge up to the camera. A green check will appear, and students will automatically be signed into their Clever page. (If they don't have their Clever Badge, students can also click on the left where it says login with Office 365 and type their email address and password if they remember it)

Once they login they will have access to resources like:

Benchmark
Education Company

World Book Online

BrainPOP
Education

MobyMax

Lexia

Other resources include: Khan Academy, Education Galaxy, Code.org, Discovery Education and Wixie (1st-4th) and many other depending on grade level.

If you have questions, please ask your student's classroom teacher or Gail Charnick, our Instructional Technology Coach (charnigl@pwcs.edu)
